

# KONA

Pictures are for illustration purposes only. Actual units may differ. Terms & conditions apply.

# Your style, your way.

The new KONA has a confident, modern style that has a way of always fitting in anywhere your journeys may take you. One look and you can tell that the new KONA is ahead of its time.

Newly sculpted front end projects a sporty, muscular look

Advanced tyre pressure monitoring system

LED headlamps\*

LED rear combination lamps\*

\*Only available on 2.0 Active, 1.6 Turbo & N Line variants.

# An interior unlike any other.

Life is just so much easier with KONA. It offers plenty of cabin space to keep everyone comfortable and ample amount of storage space. KONA's generous dimensions extend to its new 10.25" instrument panel\* and AVN unit.

Head-up Display (HUD)\*

60:40 split-folding rear seat

Wireless smartphone charging system\*\*

Ambient lighting cup holders\*\*

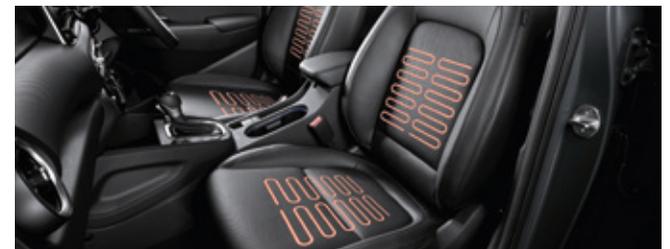

Ventilated seats\*\*\*

Full auto air conditioning system\*

Electronic parking brake with auto hold

Heated seats\*\*\*

\*Only available on 2.0 Active, 1.6 Turbo & N Line variants. \*\*Only available on 1.6 Turbo & N Line variants. \*\*\*Only available on the N Line variant.

8" Touchscreen with MP3 playback, AUX-in, USB, Bluetooth, wireless Apple CarPlay® and Android® Auto with Voice Recognition  
10.25" TFT LCD Supervision Cluster\*

**N** Line

# KONA N Line.

KONA N Line maximises the sporty factor with an appearance package that really stands out. Both the front and rear ends get the special N Line makeover as do the 18" diamond cut wheels and side cladding. The cabin abounds with N Line exclusive touches to tell the world that this is no ordinary KONA.

N Line specific steering wheel and gear shifter knob

N Line specific LED headlamps

N Line specific front bumper with grille

N Line specific rear bumper with twin tip muffler

N Line specific side emblem

N Line specific side sill moulding

N Line specific red-colour accent AC vents

N Line sport bucket seats

# An impressive performance.

From the moment you step on the accelerator to unleash KONA's full potential, you will be smiling at the surge of quiet, clean power. KONA's power plants are third generation which means they benefit from the very latest Smartstream Technologies that improve their efficiency, reliability and, most importantly, your driving enjoyment.

## Smartstream Engine

The new Smartstream turbo engines with Continuously Variable Valve Duration (CVVD) technology, the opening and closing of the cylinder valves are timed to best respond to various driving modes, such as eco-driving or dynamic driving.

While all Smartstream engines are fitted with Friction-Optimised Moving System (FOMS), where cutting-edge lightweight materials and coating technologies were used to dramatically reduce engine friction up to 34%, helping to minimise energy loss and to improve fuel economy.

### Smartstream G1.6 T-GDi\*

198 Maximum power  
PS/6,000rpm

265 Maximum torque  
Nm/1,600~4,500rpm

### Smartstream G2.0 Atkinson\*\*

149 Maximum power  
PS/6,200rpm

180 Maximum torque  
Nm/4,500rpm

## Smartstream Transmission

The Dual-Clutch Transmission (DCT) combines the advantages of manual transmission and automatic transmission. Equipped with an High-Flow Electric Oil Pump (HF-EOP) for gear lubrication and clutch cooling, providing a dynamic yet smooth shifting feel for a superior and comfortable drive.

The next generation Continuously Variable Transmission (CVT) maximised its advantages and addressed the durability and 'shifting feel' issues that plagued the original. It approximates the shifting feel of regular automatic transmissions by creating virtual shifting patterns that respond to the driver's intent.

Smartstream 7DCT-2nd generation  
Dual-Clutch Transmissions\*

Smartstream IVT 8-Virtual Speed\*\*

\*Only available on 1.6 Turbo & N Line variants. \*\*Only available on 2.0 and 2.0 Active variants.

*Smartstream*  
TECHNOLOGY

# Bring your sense of adventure.

KONA's advanced control systems give you the confidence to drive down less travelled roads or in poor weather conditions. The large jog wheel on the centre console provides access to KONA's advanced electronic control systems: This jog wheel may look simple but it offers powerful features: With a quick turn and a click, KONA keeps you going, exploring and discovering.

### Drive Mode

The Drive Mode selector offers a choice of three different settings to suit your personal preferences. Drive Mode automatically modifies the gear shift schedule to transform KONA's personality into frugal, fast or just plain normal.

#### ECO Mode

While gas mileage on the new KONA is already impressive, driving in Eco Mode is guaranteed to save you money at the fuel pump.

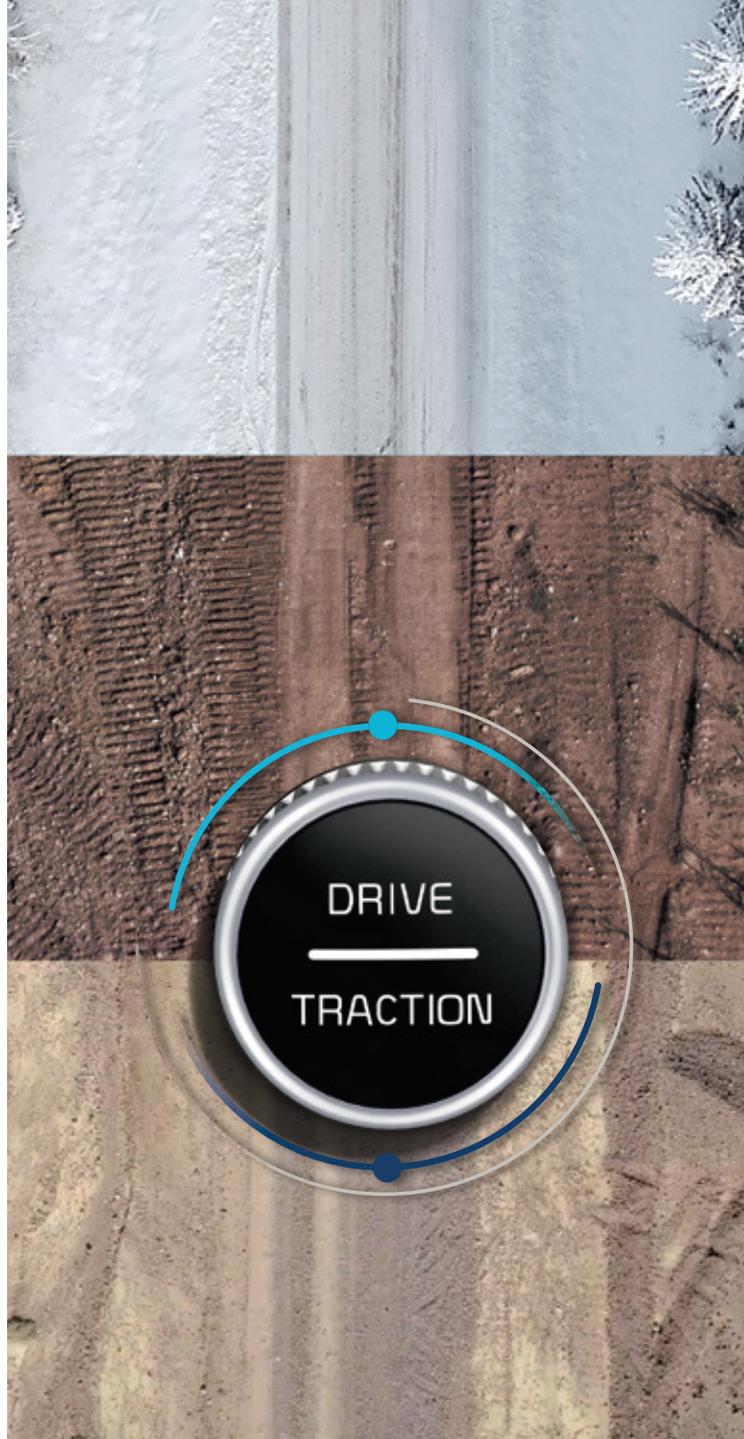

#### SPORT Mode

Sport Mode is made for those times when you just feel like letting it go. With Sport Mode dialed in, KONA responds with energetic enthusiasm, the pace quickens and the fun begins.

#### NORMAL Mode

Normal is a happy place to be as it puts you at the half-way point between Eco and Sport. Offering the best of both, this setting delivers perfectly relaxed, everyday driving performance.

### Traction Control Mode

When driving conditions become difficult, TCM steps in to ensure optimal traction. Available on both 2WD and 4WD, TCM automatically selects the right gear and regulates engine torque delivery to each individual wheel so that wheel slip is minimised.

#### SNOW Mode

Rotating the jog wheel controller puts you in Snow Mode and when the Snow Mode icon lights up on the instrument panel then you know you're really ready for some tough winter driving.

#### MUD Mode

When you're in Mud Mode, sensors can instantly detect wheel slippage and will automatically redirect torque to the wheel with the most traction so that you can keep moving despite the hazardous driving conditions.

#### SAND Mode

Driving on sand poses a unique set of challenges but KONA's smart controller keeps you moving safely ahead. Special algorithms developed for sand driving secure the right gear and ensure each wheel gets the right amount of torque at the right moment to guarantee optimal tyre traction.

# Hyundai SmartSense™

Hyundai's cutting-edge driver assistance system, built to provide you with more safety and peace of mind. From braking to avoid collisions, to detecting vehicles in your blind spot, SmartSense™ systems constantly monitor your environment to protect you from potential hazards while driving.

## Smart Cruise Control (SCC) with Stop and Go\*\*

While traveling a speed set by you, it uses radars to maintain a safe distance from the vehicle ahead. After the system slows the vehicle to a stop, it will reactivate if the vehicle in front moves within 3 seconds.

## Forward Collision-Avoidance Assist (FCA)\*

If there's danger of a collision with a car, a pedestrian or even a cyclist\*\*, FCA's front camera gives you an early warning and, if necessary, FCA automatically applies the brakes to prevent the collision.

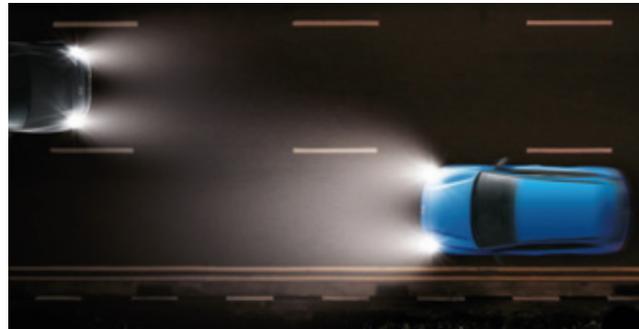

## Blind-Spot Collision-Avoidance Assist (BCA)\*

BCA uses radar to monitor both of your blind spots. If a vehicle is detected in the blind spot while the turn signal is flashing, BCA will automatically apply left or right side front braking before your attempted lane change thus helping you avert an unsafe lane change and a potential collision.

## Safe Exit Warning (SEW)\*

This pioneering innovation may sound an alert when a vehicle approaches from behind, letting passengers know it may not be safe to open the door to exit the vehicle.

## High Beam Assist (HBA)\*

Scans the road ahead for oncoming headlights, then automatically adjusts your headlamp range, switching between high and low beam as necessary.

## Lane Keeping Assist (LKA)\*

Your vehicle warns you through audio and visual cues if your vehicle drifts out of its driving lane without signalling. If necessary, it will gently apply corrective steering assistance to keep you inside the lane.

## Driver Attention Alert (DAW)\* with Leading Vehicle Departure (LVDA)\*

DAW monitors your driving patterns to detect drowsiness. If detected, it alerts you with sound cue coupled with a warning message on the instrument cluster. During a stop, LVDA will alert you if the leading vehicle departs.

## Lane Following Assist (LFA)\*

Using the front-view camera to detect lane markers on the road, this feature assists the driver's steering to help keep the vehicle centred inside the lane.

# Well protected.

The all-new KONA benefits from superior rigidity through the use of advanced high strength steel and high impact energy absorption that protects passengers in the event of a collision. The structure of the cabin is designed to disperse energy in the event of a collision, therefore reducing impact to occupants.

**5**  
YEAR  
**300,000KM**  
Mileage Warranty\*

## Peace of mind ownership.

All of our vehicles come with a 5-year or 300,000km warranty (whichever comes first). The warranty on your Hyundai is designed to help you get the most out of your owning experience.
